While developing full-stack projects with modern technologies such as React, NestJS, Node.js, and PostgreSQL, I also work on AI solutions using Python and OpenCV. I closely follow innovations in the software world and stay focused on improving myself by continuously learning new technologies. I enjoy solving complex problems with the right technology stack and advancing my skills with every new project.

EXPERIENCE

Present
February 2026

Backend Developer Intern, Morphosium Software and Hardware Services, Turkey

I actively take part in backend development processes using Node.js, NestJS, PostgreSQL, Sequelize, Git, and Docker.

Node.js NestJS PostgreSQL Sequelize Git Docker

EDUCATION

Burdur Mehmet Akif Ersoy University

Bachelor's Program in Management Information Systems, 2022 – Ongoing
4th Year Student

Sehit Abdullah Umit Sercan Anatolian High School

2017 – 2021

PROJECTS

Dongu - Free Exchange Platform

2025

github.com/recepyuksel/Dongu-app

A platform where users can freely exchange items they no longer need, managing complex listing management and user interaction processes end-to-end.

React NestJS PostgreSQL Sequelize

Digital Watcher - Smart Monitoring and Security System

2025

github.com/recepyuksel/DijitalGozcu-Python-Core

A security automation system that identifies faces as 128-dimensional vectors using Dlib-based deep learning models and provides system-level audio alerts with macOS afplay integration upon suspicious detection. A platform that dynamically calculates the duration (Year/Month/Day) that wanted individuals remain in the system through a JSON-based central database and provides interactive data access in a Tkinter interface.

Python Dlib OpenCV Tkinter Pandas JSON Pytsx3 macOS System Integration

Chatbot Project (RAG + LLM)

2025

github.com/recepyuksel/chatbot-project

I designed and implemented a RAG chatbot that provides precise and context-aware calorie information for various fruits using large language models (LLMs). I improved user interaction with custom data sources.

Python LLM RAG ChromaDB NLP Chatbot

SKILLS

Programming Languages: Python, JavaScript, SQL, C#, Swift, Kotlin

Web Development: React, Node.js, NestJS, Tailwind CSS, .NET, HTML5/CSS3

Database Management: PostgreSQL, Sequelize ORM, MS SQL Server, SQLite

Languages: English (A2 - Technical documentation follow-up)
